**PHARMAVIGILANT SELECTED BY SPECTRUM PHARMACEUTICALS, INC. TO SUPPORT  
10 STUDIES**

*PharmaVigilant's I-Vault (eTMF) Solution will be used to start new Electronic Trial Master Files*

**WESTBOROUGH, Mass., April 10, 2012** – PharmaVigilant, an e-clinical provider, today announced that US based Spectrum Pharmaceuticals has selected I-Vault as its electronic Trial Master File Platform. Spectrum, a pharmaceutical company focused on oncology drugs and unmet medical needs will standardize on the PharmaVigilant solution.

“We are excited that Spectrum has chosen to use the I-Vault solution to start new electronic trial master files” said James DeSanti, Founder and Chief Executive Officer, PharmaVigilant. “This implementation will automate monitoring of their TMF documentation and will provide Spectrum with an on-demand “dashboard” view of the their entire TMF inventory.”

**About Spectrum:**

Spectrum Pharmaceuticals, Inc. is a biopharmaceutical company that acquires, develops and commercializes a diversified portfolio of oncology and other drug candidates that meet critical health challenges for which there are few other treatment options. The Company's pipeline includes promising early and late-stage drug candidates with unique formulations and mechanisms of action that address the needs of seriously ill patients, such as at-home chemotherapy and new treatment regimens for refractory disease.
