

I-Vault rSDV

THE FUTURE OF MONITORING IS HERE

I-Vault rSDV is a software/service providing ongoing data monitoring independent of site visits—saving both significant time and costs in your development. Data is verified by remote monitors using PharmaVigilant’s systems to provide a cost effective and efficient approach to data verification. This enables our clients to control all of their assets for the first time, including copies of Source Documents, electronic Trial Master Files, and electronic Case Report Forms.

IMPROVE COMPLIANCE AND SITE INTERACTIONS

With rSDV, you are able to build a positive relationship with your sites by decreasing the number and duration of onsite monitoring visits. On site visits now focus on value added monitoring activities (i.e. recruitment, retention, training, safety).

SUPERIOR ALTERNATIVE TO TRADITIONAL 100% ONSITE MONITORING

✓	Improve data quality and accuracy
✓	Gain faster visibility into site performance: in days – not weeks <ul style="list-style-type: none"> • SDV can be performed at a rate of 6 data items/minute
✓	Assure compliance and reduce risk
✓	Achieve optimum overall monitoring effectiveness <ul style="list-style-type: none"> • Redirect onsite monitors to value added activities
✓	Deliver 100% SDV at 50% of your traditional monitoring costs <ul style="list-style-type: none"> • Eliminates 50% of the onsite interim monitoring visits
✓	Proven across multiple Sponsors, Phases & Therapeutic areas
